Question 121

Shahid

- *Please describe the process of connecting to the Dynamics 365 Business Central App using Business Central On Premise.*

#bcopendiscussion

Question 122

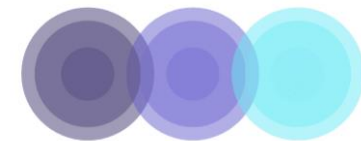

Shahid

*There are customization in base table (added few fields having data) BC14, to upgrade into BC18
I have created the extension for those base tables and created the Custom app, when I do upgrade as per MS procedure
"<https://docs.microsoft.com/en-us/dynamics365/business-central/dev-itpro/upgrade/upgrade-technical-upgrade-v14-v18>",*

I have published 1. System Application 2. Base Application 3. Application 4. My Custom Application and did the syncNAVTenant up to this point no issue.

when i try to do Sync-NAVApp for base application I am getting an error

"Sync-NAVApp : Table Currency :: The field 'Unrealized Gains Acc. (Ledger)' cannot be located. Removing fields is not allowed."
for all the customized tables. How to solve this issue, please advice.

#bcopendiscussion

Question 123

Binil

I need idea for a customization –

A Sales document with different sell-to and Bill-to customer, for Header System is picking the Default dimension from Bill to customer.

The header dimensions are copied in Lines.

Customization – For Each Item Line, we want to use Global Dimension 1 code, from Sell-to Customer Default Dimension.

Interfaces

Codeunit implements Interface

Codeunit implements Interface

Enum implements interfaces

```
Interface  
{
```

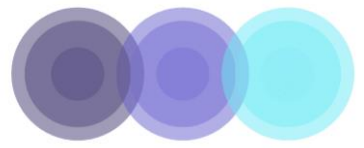

```
    Procedure P1(param : integer)
```

```
    Procedure P2(customer : Record  
        Customer)
```

```
    Procedure P3()
```

```
    Procedure P4()
```

```
}
```
