Question 3

Jignesh Dhandha

For Business Central Online version, Below are some queries related to that

- 1. if we would like to add the Option value for standard microsoft table field for which Enum is not available then how could we do that
- 2. For some customization function there is no any Subscriber Event available then how could we do that customization code ?
- 3. Where should we Lookup trigger for table field for standard table field ?
- 4. Is it possible to add SumIndexFields for Standard Key available in table ?
- 5. Can we change the Field Group value for Standard table ?
- 6. Which are the properties that we could not extend for Business Central Online version.
- 7. What is upgrade process Microsoft plan to release in Business Central 2020 Wave 2

Question 4

Snehal

Dear Sir,

Thanks for your reply, sir.

How we can do this in business central in extension. And also suggest me for CU extension in Business central

Hi,

Yes its a customization and pretty simple one.

For Purchase Document Codeunit 91 & and For Sales Document Codeunit 81, just change

Selection := STRMENU(Text000,3);

TO

Selection := STRMENU(Text000,1);

And Default selection will be Receive (Purchase) and Ship (Sales).
